Summary

B.Tech Information Technology student with hands-on experience in Java, C#, and Python, and a foundation in full-stack web development (ASP.NET MVC, SQL Server) and Android development. Proven ability to build and deploy end-to-end applications, including AI/ML-based systems using YOLO/CNN models. Seeking a Software Engineer role to apply strong problem-solving skills and deliver reliable, well-tested software.

Education

M.I.E.T. Engineering College	2022 – 2026
Bachelor of Technology in Information Technology (CGPA: 7.5 / 10) — Trichy, Tamil Nadu	
S.G.M. Sri Muthaiah Matriculation Hr. Sec. School	2022
Higher Secondary Certificate (HSC) – 64.83% — Vaitheeshwarankovil, Mayiladuthurai	
S.G.M. Sri Muthaiah Matriculation Hr. Sec. School	2020
SSLC – 63.40% — Vaitheeshwarankovil, Mayiladuthurai	

Experience

Extazee Software Solution	Jul 2025 – Aug 2025
Android Development Intern — Trichy, Tamil Nadu	
- Developed user-friendly Android mobile applications using Java, following standard software development practices. - Tested applications across multiple devices and screen sizes to ensure compatibility, stability, and responsiveness. - Debugged and resolved code-level issues to ensure correct functionality and improve application reliability.	

Projects

Food Donation Management System ASP.NET MVC, SQL Server, C#	
- Built a full-stack web application to connect surplus food donors with NGOs, streamlining the donation process. - Implemented secure user authentication and login to protect donor and recipient data. - Designed a database-driven donation tracking and reporting system for real-time visibility into donation status.	
Adaptive Wild Animal Detection System Python, YOLO, CNN, Computer Vision	
- Built an adaptive real-time detection system that processes live CCTV video feeds to identify and classify wild animals. - Applied deep learning models (YOLO/CNN) to improve detection accuracy and reduce false positives in varying field conditions.	
AI-Powered Civic Issue Reporting System RAG, LLM, Google Maps API, Chatbot	
- Developed a smart civic issue reporting platform enabling citizens to report problems with real-time Google Maps location tagging. - Built a RAG-powered chatbot to help users query issue status and get instant, context-aware responses. - Designed a priority-based issue management system to streamline triaging and resolution of reported civic issues.	

Technical Skills

Languages: Java, C#, Python
Web & Frameworks: ASP.NET MVC, Android Development, Web Development
Databases: SQL Server
Concepts: Object-Oriented Programming, Debugging & Testing, Computer Vision (YOLO/CNN), Software Development Life Cycle
Soft Skills: Problem Solving, Time Management, Critical Thinking, Leadership, Adaptability

Certifications & Languages

Certifications: Android Development – Extazee Software Solution
Languages Known: English, Tamil
